In this direct we will only transcribe Anéeka's responses related to the video's statement.

-Toni Ruiz

ROBERT – PRESENTATION

On the subject of vaccination I tell you that I will do another more technical one, this is a test, but we are going to talk about whether you can “clean” yourself from having been vaccinated or not. If you can “draw out” the vaccine after having put it in. From the outset there is no remedy, no holy water or anything else that cleanses you. If they have already put that into you, you are already infected, as is. It is not reversible.

In the next Live I will talk about the fact that there is no virus. It is not that I am a denier, I can not deny something that has never existed, and it will be demonstrated, but in the following video. It is not just that we say it, it is that there are many laboratories that have never detected anything, and there is no virus that acts the way it is acting. There is a doctor who can debate it, in the following video. Let's start, this is what our friend Anéeka of Temmer says.

ANEEKA OF TEMMER

If they are given the idea that the vaccine can also be "cleansed" they are also getting the idea of consenting to the vaccine so that it can be cleaned later, that concept is like supporting the Cabal, because the sad truth is that there is no way to clean out the vaccine. Here it has been seen that the only way to "clean" it is with a genetic laboratory where they can clean a cell or a group of cells from the person that has not yet been infected, hence creating stem cells and basically rebuilding the body from scratch by cloning it in a special medical pod. This procedure is not easy, because it cannot even be in a normal medical pod, since it reads and uses the cells that it does not see for what to replace, ending up by copying and reproducing the same pod (body) to the genetically altered cells.

Then it would be either reprogramming or using a cloning pod and then full immersion technology to pass consciousness from one body to the other. A tremendous task and it is with technology from here. Another problem is that the harmful genetic change occurs almost immediately after inoculation, since the vaccine material, the gene reprogramming material, travels through the bloodstream and in a matter of minutes invades all the cells of the body. It will only take a few circulatory cycles to lodge in all the cells of the inoculated body, but my point here is that I strongly feel that the false concept that the vaccine can be cleaned should not be overlaid in any way, because it cannot be cleaned.

These almost esoteric 'cleanings' have been used before for children's vaccines such as triple viral, (MMR) where they help to remove heavy metals, however I do not find scientific validity (and I am talking about Taygetean science, not human), or in any case minimal help, so it is true that whatever they do to help a vaccinated is valid, but the sad objective reality is that the vaccinated are already damaged for life, and that cannot be reversed even with a normal medical pod, but only with the elaborate procedure I have described above.

About one, two or three shots. It is the amount, it is harmful and fatal from the first vaccine, those boosters will simply increase the amount of active substances accelerating the process of bodily decay. That is, its harmful effects will take less time to manifest themselves. Inoculation is harmful at the level of genetic destruction with a single dose, that is why I insist that they not be vaccinated, because the reality is that its effects are not reversible. I fear that people get into the false hope or the false idea that they can be inoculated only to clean it up later, thereby increasing the amount of the inoculated.

I have told you before that it (the vaccine) is like a bullet to the head, which people are unable to see because it is not immediate like the bullet, but it is a degenerative process that can take up to several years, but the effects will depend on each person. People do not see it because it is not immediate and when the symptoms appear they will attribute them to other things from the very SARS COV 19 (another variant) justifying more inoculations or health problems that are not related to having been inoculated, including autoimmune processes, dementias, atrophies, nervous problems, collapse of the immune system, spontaneous myocardial attacks, cancers and more, the list is endless.

The medical pod is still a machine, it does not return the cells to their original etheric point, but instead replaces the individual cells. The pod must first take a healthy cell, form a DNA map of what the person is like, then replace damaged cells in the body with new stem cells programmed to every point in the body using a high-tech hologram. Precision. The problem is that the genetic change of the inoculated person alters each and every one of the cells from minutes after inoculation, therefore the medical pod does not have a basis to regenerate these cells because it cannot differentiate a cell altered by the inoculation, with the original genetic code of said person. Then we would enter the field of genetic engineering to return that body to its original state, but unlike an accident, for example, if one hundred percent of the cells in a body are damaged, it is equivalent to a new body by cloning, and for this, of course, a reliable sample of the original DNA

of the affected person would be needed. That is, the machine does not repair individual cells, it completely replaces them with new ones, people go back to their original DNA pattern because it is already contained in their cells. In other words, all your DNA is reactivated that is already in you, in each of your cells. The problem with inoculation is that the DNA base of each cell changes, and then it will not be able to return to its original pattern because those cells are no longer there. This causes a disparity between the body and the soul, or signal from The Source in the inoculated person causing them to be incompatible, the more doses they have, the more the disparity will be between the body, its DNA and the frequency of the person, which explains behaviour changes and dementias in inoculated people. The pod is only a machine, it reads the cells and reproduces them, it does not "get into" the etheric, however it can be invasively altered. The return to the original pattern would occur generations after the alteration, but as I have told you if people are sterilized with the inoculations there will be no later generations with which to return to the original DNA.

Already in 5D an inoculated altered person could have benefits by activating their DNA from 22 chromosomes, 2 threads to 24 chromosomes, 12 threads, however this will take much longer, I am talking about seven years per person, which is the personal time that is needed to replace all cells in a human body (and this is speculating, as we have no information at this time to support it), however the harmful aspects of inoculations will destroy the person's body long before seven years, so that he can't regenerate his DNA just by being in 5D.

Another problem is that even if it is reactivated to know what is reactivated, since the damage to the body's DNA is in the entire body and the DNA, creating, for example, the potential for serious alterations and congenital defects in people by having been brought to 5D by activating unforeseen changes to the DNA of the person caused by the inoculations. Because in 3D you are only seeing 60% of 5D, so that is what you reflect there, you are 60% of your own being and it is reflected there as what you see in the mirror. Another factor that controls this is the dominant frequency of the place that will alter said 5D genes, choosing genetic characteristics that determine your 3D shape according to what dominates by energy frequencies there, that is, what you inherit from your family. I assure you that if a person is still alive with a bullet in the head, they will be more easily repaired in a med-pod than an inoculated person. I only tell the sad truth, but I cannot give hopium. The med-pod has no problem repairing bullets to the head, that's what it is for.

For people who have already been inoculated there is no easy answer, what can you tell them? Find ways to drastically improve your health, improve your overall health. It also depends on the controllers whether or not they activate the graphene that (the vaccines) contain. As you will see, people still do not understand the seriousness of the issue "vaccines", inoculations, they see those words as defeatism or fear, that we impose fear. This is the kind of thing that they attack us for, they want us to say nice things... nope. Not even here we can solve their vaccinations. But we are the only aliens talking, warning about vaccines, since others only give them love and light, because we are different, we only give what we see and (what there is) is not our fault.

* * *

At minute 01.04 of the video that lasts 01.39 Anéeka answers these live questions.

Question.- I have to remove my wisdom tooth, I do not know whether to hold it without removing it (Robert adds, he is afraid that the anesthesia contains something)

Anéeka.- Does it hurt or why is it removed? On Earth they are removed for no reason, removing wisdom teeth weakens the immune system, they should only be removed if they are a real unsolvable problem. Unlikely in anesthesia (stick something in), but please consider not removing it.

Question.- Are there two toxins in vaccines, DNA modification and graphene?

Anéeka.- No, there are countless toxins and harmful compounds, not just those two.

Question.- Does graphene have something to do with black goo?

Anéeka.- Yes, it is related, but graphene has nano technology.

Question.- Is contagion through sex also for those who performed PCR?

Anéeka.- Yes, it is highly probable.

Question.- So is it also spread by saliva?

Anéeka.- Yes, it is also contagious from saliva.

Question.- How does having sex with a vaccinated person affect us, does it affect us?

Anéeka.- Yes, nanotechnology and other things can infect them, which we are just trying to isolate and study, but there are indications that they are contagious, since there are already many serious reports in alternative networks.

Question.- What happens to people who have had the disease, and are not vaccinated?

Anéeka.- Nothing, they haven't passed it. They did not pass "the disease" since there is no Covid, they only had another disease of which there have always been.

Question.- Could blood transfusions from a vaccinated person contaminate us?

Anéeka.- Of course, this is a 100% guarantee that everything will happen. That is equivalent to getting vaccinated, it's a no, no, no.

Question.- I suppose anesthesia has it too.

Anéeka.- Everything contains it, traces of graphene, but I can't be sure what each drug has it, I advise staying as far away as possible from taking medicines.

Question.- So the natural mechanisms of healing and elimination of Detox are not enough to get rid of the chemicals in the injection? Why not?

Anéeka.- That's right, they are not and it is because the damage is at the genetic level, they become modified organisms, transgenic people.

Question.- With the PCR they also give you graphene?

Anéeka.- Definitely YES, it is a direct micro injection to the brain, nano-chip implant. Looking for a deadly contagious virus at the base of the brain, inside the nose, doesn't make any sense.

Question.- Why are the rights of the Spanish Constitution violated and the judges do nothing?

Anéeka.- Because this comes from above the capacities of said judges, who for the most part have already been bought or even threatened. Yes, with this, the laws are being violated, and with the laws they can defend themselves from mandatory vaccines. Use them as much as you can!

Question.- Would the discrediting of the Russian vaccine be more of a distraction?

Anéeka.- Many have been discredited, like the Chinese one too. I see this as the action of people who are already realizing its content as inoculation and not as a vaccine against anything. I see it as positive, but it can be distracting, but for now I see it as something positive.

Question.- How to know if a vaccinated person has contaminated us?

Anéeka.- It is very difficult to know since the symptoms may be from diseases that have always existed, such as the flu, that is why those vaccinated are dangerous. More for what little we know in this regard at this time. Unfortunately it is difficult to know. And we do not know to what extent they are or are not contagious.

Question.- Anéeka, I have to operate and I already had to do the PCR, what to do?

Anéeka.- Improve your health as best you can, Health in general, continue your life like this, but not accept more of the same, much less vaccinations. The same for a vaccinated person. No more doses! Improve your health, diet, exercise and all that.

Question.- Why can't the toxins in the vaccine be eliminated from the body?

Anéeka.- Because they reproduce, because the body needs enzymes that degrade and decompose compounds in order to process and eliminate them and there are no enzymes for those components. Also because the damage is at the intracellular genetic level, it cannot be cleaned because physically they are already another person.

Question.- When a vaccinated person dies, will they go to The Source?

Anéeka.- Yes, what they do to the body has nothing to do with the signal from The Source, "Soul", only that it takes that ugly experience with it, but nothing touches the soul, don't worry.

Question.- How do 5G antennas affect vaccinated and unvaccinated people?

Anéeka.- 5G and other systems control and program what graphene and nanochips do inside the body of each vaccinated person.

* * *

Robert.- Well, nothing more, I hope you liked the live show, it has been an hour and a half live.

Anéeka has to go now, thank you all for being here.
