CONVERSATION WITH ANEEKKA OF TEMMER

Robert.- Has the Federation had control of the Earth in previous resets?

Anéeka of Temmer.- They have had control of all the resets since the great flood at least.

Robert.- Is a holographic system with a stepped Council and a matriarchal system still an option?

Anéeka of Temmer.- It is one of the best political models for a planet. It will remain an option as long as human beings in general, the masses, are prepared for it. A lot must happen right now before it can be implemented, and humans must also have the opportunity to decide which political system is best for them.

Robert.- What was the result of the meeting between the Federation and the Council of Alcione? And how do they see us awake ones?

Anéeka of Temmer.- The meeting ended almost in disaster, as they are now fragmented and almost function as two different councils. Alcione and the Federation disagree with what is happening on Earth so far.

Robert.- What does the Federation gain from working with secret societies with "acupuncture" (*Note of T: code word for the jab*) and reducing the population? Has the Federation been infiltrated, compromised or threatened?

Anéeka of Temmer.- The Federation does not see things in the same way with the same interpretation of people on Earth. Which means that it will consider all evil as part of the experience on Earth and generated by the population itself. The Federation has not been infiltrated, it has always worked that way. They did not intervene in the past during times of great upheaval like the First World War and the Second World War. They will not intervene as all of you, all of us, would wish at this time. They don't gain anything by working with secret societies, they simply work with whoever is in control of the planet, in this case deep secret societies, Illuminati, Cabal.

Robert.- If diplomacy breaks down, could humans be used, be helpful, be useful, take part in combat roles for the Council of Alcione?

Anéeka of Temmer.- Not directly, just by the choice of each human. I cannot comment further at this time.

Robert.- Does the Federation code say something about optimizing the evolution of civilizations on the planets?

Anéeka of Temmer.- Yes, and it works all the time. According to them, that is exactly what they are doing. The main reason they don't intervene directly is because they don't see why. They feel that if they help directly they will take the credit off the humans, and if they do the work for them, the humans will not learn from what is happening. They consider it necessary for humans to move from a mindset of depending on another person to being responsible for themselves.

Robert.- Anéeka, a question from the heart. How are you dealing with all this?

Anéeka of Temmer.- It is not easy for me, even trying to see things objectively, personally it is very difficult for me to see everything that is happening on Earth, and as long as I feel that I am helping in some way I will remain here, but it is very hard for me to be absorbing so much negativity. Exercise and meditation help me deal with everything. All my Love for You. Thanks for asking.

Robert.- It is obvious that the battle will intensify and it will land on our doorstep. Is there any way that the Council of Alcione has some weight to intervene in the plans of the Galactic Federation? Thank you.

Anéeka of Temmer.- The Council of Alcione is very strong and represents all civilizations within the Pleiades M-45 star system. It has a lot of weight in decisions and politics within the Federation.

Robert.- If we envision in a massive way that the 5D Federation has no power in our lives, would it be possible to make it true?

Anéeka of Temmer.- Yes, it is possible, but remember that the Federation is not an evil entity or organization, it simply is, and its ethics differ from that used on Earth, and even we as Taygetans use. So understanding things becomes a complicated process of exopolitical interactions. The Federation is also doing the best it can. It is a multi-level organization. From above it is all love and light, and integration as many say, but from immediately above the Earth, it is made up of people of non-human, non-terrestrial origin, people like you, with their interests and their desires, and needs. They are also people who live and evolve.

Robert.- Anéeka, what can we do so that the Federation Council that controls the artificial 3D Matrix here on Earth decides to stop this genocide that has started?

Anéeka of Temmer.- From below all you can and must do is resist as best you can what is coming. That in itself is a powerful message to the leadership of the Federation, but everyone should try to solve the problem without outside help, and from here the races that do not agree with the procedures of the Federation will do everything possible to stop things. From this side, as we have already done and begun.

Robert.- Hasn't the Federation established bodies of cooperation among the general population of Earth? How can the Federation's opinion on how to save the Earth be considered qualified?

Anéeka of Temmer.- You have a very good point. We have also observed it. That is one of the reasons why we do not agree with their procedures.

Robert.- The Federation has failed. Are you thinking of taking more radical actions, let's say strategies outside the established and legal framework to address this situation?

Anéeka of Temmer.- The Federation has not failed, it simply works as usual. That is the problem in the first place. No intervention is also regressive from the valid point of view of the people on Earth who suffer from the problem. The strategies have been presented, of course, only on the side of the Council of Alcione and the allies.

Robert.- My question is: does the Federation want planet Earth for other purposes and that is why they want to get rid of humans?

Anéeka of Temmer.- The Federation already had planet Earth, it is their property, they are only modifying it to meet their current needs. The allied race of the Council of Alcione has claimed that the Earth is theirs and not the Federation. As a comment you cannot indicate which one. The main reason they want to get rid of humans is because they see them as too many and they will collapse the ecosystems and the entire planet with them. We affirm that there are other options not including genocide. The problem here is that for those other options to work, the people in power, Deep Cabal, Illuminati, would have to give up their power and resources, and they don't want to give up their power, so that's the main problem here. It is not the Federation that wants to get rid of humans, that comes from the deep Cabal and the people in secret societies that control the Earth. The plan to depopulate the Earth essentially comes from more humans, those in actual positions of power, Cabal, Illuminati, and the Federation is just being permissive about it, and this from the point of view of the Alcione Council and its allies, is as bad as planning the genocide in the first place.

Robert.- Does Anéeka believe that bitcoin will help us regain power?

Anéeka of Temmer.- I do not see bitcoin as a real option that produces a significant change at the moment, since it is as controlled as any other monetary system that only gives the illusion of being free. If it helps you and others, then it is helpful, but not on a larger scale.

Robert.- Why aren't the Alphrateans with us? Thank you.

Anéeka of Temmer.- They operate within the legal context of the larger Federation, and all their operations come from that central Federation command. According to them, they are doing the right thing and they are helping humans on Earth to the best of their ability, according to them.

Robert.- What is the position of the superior Federation in the legal battle between the rebels and the Federation?

Anéeka of Temmer.- Only guidance from both sides, since they understand that from above there are no sides at all, only conflicts that reflect the internal state of the people who make up the Federation. The upper Federation understands that if something is not right and it is not ethical on one level, on any lower or higher level, then it is not correct or ethical on any level, then their point of view would have to be that of wanting to solve everything with respect, love and integration. They do not agree with what is happening on Earth right now.
